Dear Vestas Hiring Team,

5 years' experience working with data. Expertise in quantitative modeling, growing people and making data-driven decisions. Currently working as a **Research Associate (Ph.D. Candidate)** at the intersection of computer science, statistics and the social sciences as member of both the **Entrepreneurship & Data Science** groups.

I am looking for a position where I can use the skills that I have developed during my years in practice and academia to lead projects in the frame of analytics. As **People Data Scientist** at Vestas, I would be able to leverage my experience in teaching and applying data-driven techniques and would be able to solve the problems I most enjoy working on (technologies used mostly: **R, SQL and Python**).
